

Dear Parents,

As you know our Gr 4's have been exploring the science unit, Waste and Our World. They have spent several months working very hard on ways that promote a positive change for our environment, where they can inspire action in others!

Students looked at the things in our world today that are having an impact on our environment; waste being one of those things. In class they brainstormed topics that they felt connected to and came up with the following groups: Water Pollution, Composting, Energy & Air Pollution, Recycling Programs, Forests, and Plastic Use.

Each group was then given the task to create an 'Action Project' that allowed them to explore the issues within those larger areas. In their projects they were asked to research, communicate, and inspire others into action to make a positive change in our world. These projects have now taken shape and our students are eager to share and inspire others!

We would like to invite you to join us for an

Environment Expo

November 29th

Calgary Science School

5915 Lewis Drive S.W.

From 1-2:30pm

Where students will share with you what they have uncovered...
The presentations include: iMovies, Tri-folds, Posters, Keynote Presentations,
and Experiments!

They are looking forward to this and would love it if you could join us!

Sincerely,

Mrs. Melville & Mrs. Paxton
